

北京邮电大学 2024—2025 学年第一学期

《高阶综合英语》期末考试试题 (A 卷)

考 试 注 意 事 项	一、学生参加考试须带学生证或学院证明, 未带者不准进入考场。学生必须按照监考教师指定座位就坐。 二、书本、参考资料、书包等物品一律放到考场指定位置。 三、学生不得另行携带、使用稿纸, 要遵守《北京邮电大学考场规则》, 有考场违纪或作弊行为者, 按相应规定严肃处理。 四、学生必须将客观题答案做在答题卡上, 客观题做在试卷及草稿纸上一律无效。 五、学生必须填涂正确的考号, 填错或不填一律无效成绩处理, 后果自负。 六、学生必须将主观题答案做在答题纸上, 主观题做在试卷及草稿纸上一律无效。
----------------------------	---

Part I Listening Comprehension (25 %)

Section A (7%, 1 point/per)

Directions: In this section, you will hear several news reports. At the end of each news report, you will hear two or three questions. Both the news report and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D).

News Item One

Questions 1 to 2 are based on the recording you have just heard.

- | | |
|---|------------------------------|
| 1. A) Her house was on fire. | B) Her house was blown down. |
| C) The smoke blew into the city she lives in. | D) She had burning eyes. |
| 2. A) 4. | B) Over 100. |
| C) 1,300. | D) Not mentioned. |

News Item Two

Questions 3 to 4 are based on the recording you have just heard.

- | | | | |
|----------------------------|-------------------|--------------|---------------------|
| 3. A) On Mars. | B) In the space. | C) In China. | D) In the U.S. |
| 4. A) Circling in the air. | B) Launching off. | C) Testing. | D) Landing on Mars. |

News Item Three

Questions 5 to 7 are based on the recording you have just heard.

- | | |
|------------------------------------|-------------------------|
| 5. A) A founder of a social media. | B) An online celebrity. |
| C) A movie star. | D) A video director. |
| 6. A) Hong Kong and Fujian. | B) Macau and Hong Kong. |
| C) Macau and Quanzhou. | D) Canton and Fuzhou. |
| 7. A) Surprise. | B) Happiness. |
| C) Confidence. | D) Popularity. |

Section B (8%, 1 point/per)

Directions: In this section, you will hear two long conversations. At the end of the conversation, four questions will be asked about what was said. Both the conversation and the questions will be spoken only once. After each question there will be a pause. During the pause, you must read the four choices marked A), B), C) and D), and decide which is the best answer.

Conversation One

Questions 8 to 11 are based on the recording you have just heard.

- | | |
|--|---|
| 8. A) Why children are dependent on mobile phones. | B) Whether children should have mobile phones. |
| C) Whether mobile phone is a good thing. | D) Why mobile phones are not good for children. |
| 9. A) It is quite dangerous. | B) It is part of growing up. |

- C) It is a good way to start using technology. D) It is a big problem in terms of teaching children responsibility.
10. A) Being dependent on technology is a definite negative thing.
 B) Bicycles and boys could be unsafe.
 C) Technology is a necessity in our lives.
 D) Having mobile phones cost a lot of money.
11. A) Children are competent in using technology.
 B) Children used to spend less money.
 C) Children used to play out a lot.
 D) Children often talk on phones when they walk on the road.

Conversation Two

Questions 12 to 15 are based on the recording you have just heard.

12. A) Their plans for the next semester. B) Their interest in realistic paintings.
 C) Their art learning experience. D) Their knowledge of art forms.
13. A) These paintings are abstract. B) Brush and ink painting has a long history.
 C) These paintings use limited materials. D) Brush and ink painting is rich in techniques.
14. A) He is not creative enough. B) He doesn't like expressionism.
 C) He has not tried painting with ink. D) He doesn't want to learn anything new.
15. A) Asian art and calligraphy. B) Asian painting techniques.
 C) Oil painting course. D) Brush and ink painting.

Section C (10%, 1 point/per)

Directions: *In this section, you will hear three short passages. At the end of the passage, you will hear three questions. Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D).*

Passage One

Questions 16 to 19 are based on the recording you have just heard.

16. A) Pictures of Olympic opening ceremonies. B) Pictures of famous soccer players and basketball players.
 C) Pictures of athletes biting their gold medals. D) Pictures of beautiful female athletes.
17. A) Because they want to make sure their victory is real.
 B) Because they regard it as an impressive pose that photographers like.
 C) Because they want to test whether the metals are gold or not.
 D) Because old pirate stories told them to bite the medals.
18. A) 100% gold. B) 100% silver.
 C) 1.34% gold and the rest is silver. D) 1.34% silver and the rest is gold.
19. A) The most suitable in history. B) The most sustainable in history.
 C) The most precious in Brazil. D) The heaviest in Brazil.

Passage Two

Questions 20 to 22 are based on the recording you have just heard.

20. A) Avoiding catching a cold. B) Avoiding having a dry mouth.
 C) Voice. D) Attitude.
21. A) Because they are harmful to your throat. B) Because they are harmful to your stomach.
 C) Because they are harmful to your teeth. D) Because they make you feel bad.
22. A) Asking you to speak louder. B) Asking you to take care of your sore throat.
 C) Asking you to sit up straight. D) Asking you to be critical.

Passage Three

Questions 23 to 25 are based on the recording you have just heard.

23. A) To develop business relations between Britain and other countries.
 B) To promote cultural relations between Britain and other countries.
 C) To increase political influence of Britain on other countries.
 D) To attract foreign investments.
24. A) The U.K. B) The U.S. C) Australia. D) China.
25. A) It globally creates a favorable attitude towards Britain.
 B) It attracts visitors to Shakespeare's theaters.
 C) It makes English popular in non-English speaking countries.
 D) It attracts tourist to Britain.

Part II Vocabulary and Structure (10%, 0.5 point/per)

Directions: For each of the following incomplete sentences, there are four words or expressions marked A), B), C) and D). Choose the one that best completes the sentence.

26. The Eiffel Tower, located in Paris, is an instantly _____ landmark often seen as a symbol of France.
 A. visible B. recognizable C. identifiable D. detectable
27. Every spring, thousands of tourists _____ to this beautiful park because of the cherry blossoms.
 A. rush B. zoom C. hurry D. flock
28. My brothers and I were _____ in classical music from childhood.
 A. lost B. immersed C. steeped D. soaked
29. In her presentation, she claimed that sampling the local food may be one of the _____ of a holiday abroad.
 A. times B. sceneries C. scenes D. delights
30. Sarah has a strong _____ to her childhood home and often visits it to relive cherished memories.
 A. sentiment B. disappointment C. refreshment D. attachment
31. Jazz and Blues _____ prominently in the magazine for music lovers.
 A. root B. characterize C. feature D. simplify
32. The speaker proposed a number of practical _____ to English learning.
 A. methods B. ways C. approaches D. keys
33. His supervisor pointed out that he was not going _____ the project in the right way.
 A. about B. on C. with D. up
34. The old photographs _____ strong memories of my happy childhood.
 A. suggested B. evoked C. indicated D. promised
35. I generally _____ a show when I am in London.
 A. take in B. take on C. take off D. take over
36. Space exploration has _____ endless innovation in various fields.
 A. intrigued B. caused C. stirred D. sparked
37. Your essay does not _____ the real issues.
 A. focus B. attend C. address D. shelter
38. Some people feel that they are living on the _____ of society and do not really care about their future.
 A. fringe B. suburb C. circle D. scope
39. We should _____ the scope of the study to examine some other assumptions.
 A. narrow B. enlarge C. magnify D. extend
40. The fight against poverty is no easy task; it is a _____ that we need to fight for.
 A. job B. cause C. profession D. mission
41. Recent research has _____ new light on the causes of the disease.
 A. given B. brought C. created D. shed
42. The two astronauts' confidence was _____ when they succeeded in the first step.

- A. enlarged B. boosted C. overcame D. inflated
43. Growing levels of pollution represent a serious health _____ to the local residents.
- A. hazard B. exposure C. display D. problem
44. Though his background was modest, it was in no sense _____.
- A. renowned B. established C. deprived D. privileged
45. Due to climate change in the past decades, this area has become increasingly _____.
- A. hostile B. unfriendly C. unstable D. inhospitable

Part III Reading Comprehension (30%)

Section A Matching (10%, 1 point/per)

Directions: In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with some letters. Answer the questions by marking the corresponding letter(s) on the Answer Sheet.

Rocking the House

[A] Imagine what it might be like if you were in your bedroom during an earthquake. Your bed shakes. Books and stuffed animals tumble from shelves. Your computer monitor skitters (滑动) across your desk and crashes to the floor. The walls creak and groan as they flex (折曲). In a very big earthquake, your whole house could collapse.

[B] To get a better idea of what might happen to an ordinary house during an earthquake, engineers did an experiment — a big one. In one corner of a building the size of an airplane hangar (飞机修理库), they built a townhouse. Then, they shook the house with the force of a large earthquake. The house, a full-scale model of an 1,800-square-foot townhouse like many found in California, is the largest wooden structure ever tested in a simulated (模拟的) earthquake, says Andre Filiatrault. He's a civil engineer at the State University of New York at Buffalo, where the test was conducted last November.

[C] So, why did researchers spend several weeks building a full-size townhouse, and then try to destroy it in seconds?

[D] First, tests of small models often don't provide accurate answers because the models are stiffer than full-size structures.

[AB] Second, the researchers wanted to see how the townhouse moved and flexed as it experienced the strong vibrations. "Scientists don't really understand how wood-frame buildings perform in an earthquake," says Filiatrault. Usually, researchers get to look at buildings only after an earthquake has knocked them down, he notes.

[AC] Finally, the researchers wanted to see what happened to furniture and other bulky items inside the home while the simulated earthquake rocked the house. With the help of Filiatrault's wife and children, the engineers decorated the house. They put dishes, silverware, a flower arrangement, and a pitcher of water on the dining room table. They furnished one bedroom like a college dorm room, one like a master bedroom, and one like a child's room. They even put a car in the garage. Then, during the test, they watched the action through eight webcams that they'd placed at various points throughout the house.

Model Home

[AD] The townhouse tested in Buffalo, like 90 percent of the houses and apartment buildings built in the United States, has a wooden frame. This means the skeleton inside the walls of the building is made of lumber, usually a type of board called a two-by-four. The test home's inside walls were covered with drywall, and its outside walls were covered with large sheets of chipped wood that was glued together. The outside surfaces were coated with three layers of stucco (灰泥), and then painted. The house even had windows and sliding-glass patio doors.

[BC] The researchers installed hundreds of sensors in the home, including 75 sensors to monitor the accelerations caused by the shaking and 125 to measure how far various parts of the structure moved back and forth. The test home didn't have plumbing or very much electrical wiring, says John van de Lindt, a civil engineer at

Colorado State University in Fort Collins. However, these items don't add much structural strength to a house, so the simulated earthquake test should provide accurate results, he notes.

Test Quake

[BD] The model townhouse rested on a concrete slab that was bolted to two platforms called shake tables. Computer-controlled equipment moved the tables back and forth.

[CD] Before the scientists conducted the big earthquake simulation, they did dozens of small tests. They did some of the tests after the wooden skeleton was built, and others after the sheets of drywall had been attached. Yet other tests were done after the stucco had been added. By comparing the results of these tests, engineers can figure out which individual parts of a home make it strong, van de Lindt explains.

[ABC] In the big test, the researchers simulated ground motions recorded during a magnitude — 6.7 earthquake that struck Northridge, Calif., in January 1994. That quake, or temblor, killed 57 people. Sixteen of them died in a single, wood-frame apartment building. The earthquake caused about \$10 billion in damage.

[ABD] Despite the intense shaking during the test, the model house didn't collapse. The windows didn't even break. But furnishings were tossed about, drywall cracked, and stucco fractured (碎裂).

[ACD] The researchers made several important findings. Early analyses show that drywall on the inside surfaces of outside walls adds to a house's strength. The tests also settled a long-standing debate about whether stucco can provide structural support for a building. The answer is yes, says Filiatrault.

What's next?

[BCD] For the next 2 years, Filiatrault, van de Lindt, and the other members of their team will use the data they gathered during their tests to improve computer programs that engineers use to design and analyze wooden structures. They'll also use information that they discovered when they disassembled (拆卸) the house after the tests. They know now, for example, which pieces of wood crack and where they break apart. Then, the engineers will put their new computer software to the test. That's when they'll design, construct, and test a six-story wood-frame building in Japan, on the world's largest shake table.

- _____ 46. Small models are tougher than big ones and hence may not present precise statistics.
- _____ 47. 90% of the houses and apartments in America have wooden skeletons.
- _____ 48. Many small experiments had been done before the big simulated earthquake test was conducted.
- _____ 49. The townhouse model in Buffalo is the largest wood-frame house built for the simulated earthquake experiment.
- _____ 50. The townhouse model survived in the intense rock of the test but the furnishings inside were moved turbulently.
- _____ 51. According to Filiatrault, in the past scientists cannot give a thorough description of what happened to wooden houses during an earthquake.
- _____ 52. The earthquake that hit Northridge in January 1994 killed 57 people.
- _____ 53. John van de Lindt thinks the absence of plumbing in the test home would not affect the accuracy of the simulated earthquake test.
- _____ 54. The engineers will improve design-and-analysis techniques based on the data they collected in their tests.
- _____ 55. The townhouse model used in the simulation test had been equipped with windows and sliding-glass patio doors.

Section B Close Reading (20%, 2 points/per)

Directions: In this section, there are two passages followed by some questions. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on the *Answer Sheet* with a single line through the center.

Passage One

In a time of low academic achievement by children in the United States, many Americans are turning to Japan, a country of high academic achievement and economic success, for possible answers. However, the answers provided by Japanese preschools are not the ones Americans expected to find. In most Japanese preschools, surprisingly little emphasis is put on academic instruction. In one investigation, 300 Japanese and 210 American preschool teachers, child development specialists, and parents were asked about various aspects of early childhood education. Only 2 percent of the Japanese respondents (答问卷者) listed "to give children a good start academically" as one of their top three reasons for a society to have preschools. In contrast, over half the American respondents chose this as one of their top three choices. To prepare children for successful careers in first grade and beyond, Japanese schools do not teach reading, writing, and mathematics, but rather skills such as persistence, concentration, and the ability to function as a member of a group. The vast majority of young Japanese children are taught to read at home by their parents.

In the recent comparison of Japanese and American preschool education, 91 percent of Japanese respondents chose providing children with a group experience as one of their top three reasons for a society to have preschools. 62 percent of the more individually-oriented (强调个性发展的) Americans listed group experience as one of their top three choices. An emphasis on the importance of the group seen in Japanese early childhood education continues into elementary school education.

Like in America, there is diversity in Japanese early childhood education. Some Japanese kindergartens have specific aims, such as early musical training or potential development. In large cities, some kindergartens are attached to universities that have elementary and secondary schools. Some Japanese parents believe that if their young children attend a university-based program, it will increase the children's chances of eventually being admitted to top-rated schools and universities. Several more progressive programs have introduced free play as a way out for the heavy intellectualizing in some Japanese kindergartens.

56. We learn from the first paragraph that many Americans believe _____.
A) Japanese parents are more involved in preschool education than American parents
B) Japan's economic success is a result of its scientific achievements
C) Japanese preschool education emphasizes academic instruction
D) Japan's higher education is superior to theirs
57. Most Americans surveyed believe that preschools should also attach importance to _____.
A) problem solving
B) group experience
C) parental guidance
D) individually-oriented development
58. In Japan's preschool education, the focus is on _____.
A) preparing children academically
B) developing children's artistic interests
C) tapping children's potential
D) shaping children's character
59. Free play has been introduced in some Japanese kindergartens in order to _____.
A) broaden children's horizon
B) cultivate children's creativity
C) lighten children's study load
D) enrich children's knowledge
60. Why do some Japanese parents send their children to university-based kindergartens?
A) They can do better in their future studies.
B) They can accumulate more group experience there.
C) They can be individually oriented when they grow up.
D) They can have better chances of getting a first-rate education.

Passage Two

Sport is not only physically challenging, but it can also be mentally challenging. Criticism from coaches, parents, and other teammates, as well as pressure to win can create an excessive amount of anxiety or stress for

The early years of development are critical years for learning about oneself. The sport setting is one where valuable experiences can take place. Young athletes can, for example, learn how to cooperate with others, make friends, and gain other social skills that will be used throughout their lives. Coaches and parents should be aware, at all times, that their feedback to youngsters can greatly affect their children. Youngsters may take their parents' and coaches' criticisms to heart and find a flaw (缺陷) in themselves.

61. An effective way to prevent the burnout of young athletes is _____.
A) to reduce their mental stress
B) to increase their sense of success
C) to make sports less competitive
D) to make sports more challenging

62. According to the passage, sport is positive for young people in that _____.
A) it can help them learn more about society
B) it enables them to find flaws in themselves
C) it can provide them with valuable experiences
D) it teaches them how to set realistic goals for themselves

63. Many coaches and parents are in the habit of criticizing young athletes _____.
A) believing that criticism is beneficial for their early development
B) without realizing criticism may destroy their self-confidence
C) in order to make them remember life's lessons
D) so as to put more pressure on them

64. According to the passage parents and coaches should _____.
A) pay more attention to letting children enjoy sports
B) help children to win every game
C) train children to cope with stress
D) enable children to understand the positive aspect of sports

65. The author's purpose in writing the passage is _____.
A) to teach young athletes how to avoid burnout
B) to persuade young children not to worry about criticism
C) to stress the importance of positive reinforcement to children
D) to discuss the skill of combining criticism with encouragement

Directions: *In this part, there is a passage with 10 blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Each choice in the blank is identified by a letter or letters. Please mark the corresponding letter(s) for each item on the Answer Sheet. You may not use any of the words in the bank more than once.*

第7页，共8页

blaze at Notre-Dame Cathedral in Paris devastated large parts of the building. It 68 to the destruction of the spire, clock, and the central frame of the 12th-century Gothic landmark. Thousands of people 69 in the streets around the cathedral, 70 the flames in silence. It is probably not an exaggeration to say that people around the world were in a state of great 71.

But it is not just the historical and international 72 that made the fire an event to remember. It was its grave significance and the shock, too. So shocking, so remarkable was the news that many people across the globe acted on 73 and went to tell someone else about it, thus 74 the old saying that bad news travels fast. Years 75 the event, many people can still remember exactly where they were and what they were doing when they first heard it.

A) gathered	B) shock	C) led	D) before
AB) prominence	AC) occurred	AD) proving	BC) resulted
BD) impulse	CD) disappeared	ABC) after	ABD) given
ACD) observing	BCD) dimension	ABCD) collected	

Part V Translation (10%)

Directions: Please translate the following passage into English.

社交媒体已经成为现代生活中不可或缺的一部分。无论是日常交流、工作合作，还是获取新闻和娱乐信息，越来越多的人选择通过社交媒体来满足自己的需求。虽然社交媒体带来了便利和乐趣，但也存在一些负面影响。例如，过度依赖社交媒体可能导致人际关系的疏远，甚至影响心理健康。为了应对这些问题，许多人开始自觉减少在社交媒体上的时间，寻求更加平衡的生活方式。

Part VI Writing (15%)

Directions: For this part, you are required to write an essay entitled *Self-Awareness: The Key to Academic and Career Success*. You should write at least 120 words but no more than 180 words.
